Message from the Guest Editors

Dear Colleagues,

Cardiac arrest and cardiopulmonary resuscitation (CPR) continue to be major burdens worldwide. To address these and further issues, international and national resuscitation guidelines are published regularly, most recently the European and American guidelines. These guidelines, published every five years, contain full details on epidemiology, lifesaving systems, first aid, basic and advanced life support, and cardiac arrest in special circumstances. In addition, there are also chapters concerning newborns, infants, and other aspects of pediatric life support. Other important topics, such as post-resuscitation care, education for resuscitation, and, since the COVID-19 pandemic at least, the ethics of resuscitation and end-of-life decisions, are also addressed. The scope of this Special Issue is to provide an overview of recent advances in the field of CPR, with each topic being addressed by experts in the field. Therefore, researchers in the field of CPR are encouraged to submit original articles or reviews to this Special Issue (case reports and short reviews are not accepted).

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
