Message from the Guest Editor

Dear Colleagues,

As we observe a dramatic increase in the number of persons affected by ocular disorders, the identification of mechanisms behind the pathophysiology and therapy of retinal diseases is an area of significant research efforts, attracting scientists from diverse fields, including neuroscience, pharmacology, and medicinal chemistry.

This Special Issue is aimed at highlighting the importance of the discovery and mechanistic characterization of novel drug targets, signaling pathways, and pathological mechanisms in different retinal diseases. In addition, this Special Issue will emphasize the importance of retinal imaging in the diagnosis and characterization of these disorders. Papers of interest include, but are not limited to, laboratory and clinical studies on retinal disorders.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
