Message from the Guest Editor

Iatrogenia is a very common problem in clinical practice, making it a public health problem. It is said to be responsible for 30% of hospitalizations, particularly impacting the elderly. In this context, knowledge is constantly evolving. A great deal of research is being carried out to try to predict, prevent and treat iatrogenia. Such research is particularly in line with the framework of personalized and participatory medicine. Researchers of all specialties are invited to contribute to this Special Issue concerning the side effects of drug therapy in the elderly.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
