Message from the Guest Editors

This Special Issue seeks to explore current cutting edge research in nuclear medicine and multimodal imaging, as well as the emerging technologies that will impact the field over the next 5–10 years.

We request contributions including:

- Reviews and editorials (some of which will be invited) describing the current state of the art or perspectives on future developments, challenges, and the direction of the field;
- Original research articles describing emerging techniques and pre-adoption technology and developments which have the potential to impact and shape the future roadmap of nuclear medicine.

Message from the Editor-in-Chief

The imaging term, specific with journal, is to be considered in its broadest sense. Image processing, image understanding and computer vision are all terms related to imaging acquisition, its processing and the extraction of relevant information from the scene to obtain the underlying knowledge. All tasks related to the above items are oriented toward specific applications in a broad range of areas and topics. The *Journal of Imaging* is conceived as an efficient vehicle in the scientific community for the communication and transmission of the progress and research results in the topics covered.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, dblp, Inspec, Ei Compendex, and other databases.

Journal Rank: CiteScore - Q2 (*Computer Graphics and Computer-Aided Design*)
