Message from the Guest Editors

We are pleased to announce a Call for Papers for a Special Issue on Cognitive Motivation in *Intelligence*. The aim of this Special Issue is to shed light on the nature and nomological network of traits related to cognitive motivation, such as the Need for Cognition and other investment traits; their interplay with personality, motivational, and ability traits; and to learn more about their longitudinal development as well as about their implications in different contexts of life.

Despite the growing body of literature in the field, little is known about the underlying processes and mechanisms or developmental trajectories of Cognitive Motivation, and longitudinal explorations are scarce. Consequently, we especially welcome theoretical contributions that advance our understanding of the nature of Cognitive Motivation; articles that focus on developmental perspectives, such as developmental trajectories or factors impacting the development of investment traits; and longitudinal studies demonstrating the usefulness of Cognitive Motivation beyond academic contexts and for dealing with not only cognitive challenges.
