Message from the Guest Editors

Fingerprinting is a popular technique utilized for indoor positioning, and can utilize various technologies and signals, including Wi-Fi, Bluetooth Low Energy (BLE), or the magnetic field. One of the key reasons for the popularity of fingerprinting is its versatility in different environments. Additionally, it enables the estimation of positions in indoor spaces without the need for access point positions, floor plan information, or the deployment of dedicated infrastructure or specialized hardware.

Topics of interest include, but are not limited to:

- Novel fingerprinting positioning solutions;
- Emerging technologies for positioning (e.g., 5G, Wi-Fi 6, etc.);
- Enhancing location fingerprinting with data fusion;
- Hybrid indoor positioning systems;
- New methods for radio map creation and maintenance;
- Crowdsourcing approaches in location fingerprinting;
- Data collection and management for large-scale location fingerprint databases.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank: CiteScore - Q1 (*Control and Optimization*)
