Department of Gynecology and
Gynecological Oncology,
University Hospital Bonn, 53127
Bonn, Germany

Deadline for manuscript
submissions:

closed (15 July 2022)

Message from the Guest Editors

Urological cancers have increased significantly in recent years and are expected to increase by 23% until 2030. This prediction includes cancers of the kidney, ureter, bladder, urethra, penis, prostate, and testicles. Recent clinical trials show encouraging results, and the prognosis of urological tumors can often be transformed from life-threatening to chronic disease. In particular, significant progress has been made in the treatment of locally advanced and metastatic prostate and renal cell cancer. However, despite significant research efforts and new treatment options, treatment failure and the development of resistance are still the most critical challenges in everyday clinical practice. Against this background, the development of new and complementary therapeutic strategies in urooncology is mandatory.

This Special Issue aims to publish original works and reviews that highlight the potential of experimental therapeutic approaches and strategies from basic and translational research targeting urological cancers.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
