

Corrosion Management in a Digital World

Guest Editor:

Dr. Andrew Spowage

School of Engineering and
Materials Science, Queen Mary
University of London, London, UK

Deadline for manuscript
submissions:

closed (20 February 2022)

Message from the Guest Editor

In recent years, there has been a wide range examples of digitalisation presenting new opportunities in corrosion research, corrosion design and operational corrosion management. However, integration of traditional corrosion knowledge into the new digital economy and vice versa is still very much in its infancy.

This Special Issue presents a unique opportunity for corrosion engineers, researchers and digital technologists to interact with and report on current best practice, lessons learned, the latest technologies and projections for what the future may have in store. It is my pleasure to invite academicians, engineers, corrosion professionals and digital leaders to submit a manuscript to this Special Edition. The scope of the Special Edition is broad; the following areas are of particular interest:

- Data and design
- Corrosion prediction and management;
- Corrosion monitoring and measurement;
- Corrosion inspection and integrity management;
- Using data for more proactive corrosion management;
- Making data-driven decisions;
- Integrating digital technologies;
- Corrosion and drone-based technologies;
- Digitalisation and cost reduction.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
