Message from the Guest Editors

Dear Colleagues,

Nowadays, advanced carbon materials represent one of the most interesting classes of materials due to their potential and current applications in electronic devices and electrodes, high-performance coatings, as well as heterogeneous catalysts, catalyst support, or electrocatalysts. They can be synthesized from different raw materials with high purity; they can be doped with other atoms and can even be incorporated into innovative carbon-based composites or be printed as inks or included in/on monolithic structures. Their textural and chemical characteristics can be tuned with subtle modifications of the synthesis experimental conditions depending on the specific application required.

This Special Issue will deal with the recent development of advanced carbon materials and their design, preparation, and/or applications. Synthesis procedures, characterization techniques, and applications for these fascinating materials will be covered, and novel insights may be presented.

It is our pleasure to invite you to submit a manuscript for this Special Issue. Full papers, short communications, and reviews are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty comprehensive topics: biomaterials, energy materials, advanced composites, structure analysis and characterization, porous materials, manufacturing processes and systems, advanced nanomaterials, smart materials, thin films and interfaces, catalytic materials and carbon materials, materials chemistry, materials physics, optics and photonics, corrosion and materials degradation, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics, metals and alloys, general. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compindex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and many other databases.

Journal Rank: JCR - Q1 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
