### Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to research activities concerning the wear and corrosion behaviour of metallic coating materials. Topics of interest may range from fundamental understanding of the mechanisms to special solutions for practical application. Materials are exposed to different types of wear and corrosion attack, leading to severe material degradation. Therefore, the knowledge on surface engineering must be combined with fundamental information on materials science to understand the observed phenomena and prevent further failure.

In this context, submissions may tackle subjects like technologies for the deposition of metallic coatings, additive manufacturing methods, or the surface postprocessing of applied coatings using laser or electron beam sources. Functional gradient advanced materials as well as structured surfaces with special applications have been developed and applied in recent years, but some key problems still need to be elucidated and solved.

It is my pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are all welcome.

*Dr. Gabriela Mărginean*

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
