Materials Science, Siberian
Branch, Russian Academy of
Sciences, Tomsk, Russia

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editor

The high characteristics of strength, wear resistance, fatigue strength, and corrosion resistance of nanostructured materials (thin films and coatings, nanocrystalline materials, etc.) determine their crucial importance in the development of advanced materials. This Special Issue will provide insights into the multi-scale approach to understanding the mechanisms of deformation and fracture of nano and thin film materials.

Keywords

- coatings
- fracture mechanisms
- delamination
- cracking
- microstructure

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
