Dear Colleagues,

Algebra is a well-known research subject in the field of mathematics. Discrete mathematics is also very important subject and research area. These subjects are especially important in the development of computer science and cryptography. Thus, the aim of this Special Issue is to promote the exchange of ideas between researchers and to spread new trends in these areas. The issue is focused on all aspects of algebra, linear algebra and matrix theory, discrete mathematics and graph theory, BCK algebra and related algebraic systems, and their applications in computer sciences, informatics, decision-making problems, etc.

## Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
**Journal Rank:** JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics )
