

## 10th Anniversary of Metabolites: The Changing Landscape of Metabolomics

Guest Editor:

**Prof. Dr. Peter Meikle**

Metabolomics Laboratory  
NHMRC, Baker Heart and  
Diabetes Institute, Melbourne,  
VIC 3004, Australia

Deadline for manuscript  
submissions:

**closed (30 December 2020)**

### Message from the Guest Editor

This Special Issue is dedicated to celebration of the 10th anniversary of *Metabolites* (ISSN 2218-1989). To commemorate this milestone, we are requesting submission of reviews of the field and research papers that are "pushing the boundaries of metabolomics and lipidomics". The scope of these manuscripts should fall within the range of the mission of the journal, but is not limited to any particular themes: <https://www.mdpi.com/journal/metabolites/about>.

*Metabolites* (ISSN 2218-1989) is an open-access journal of metabolism and metabolomics, supported by an outstanding Editorial Board composed of high-profile researchers. It just received its First Impact Factor of 3.303, and is indexed by the Science Citation Index Expanded (Web of Science), PubMed Central, Scopus (CiteScore in 2018: 3.75), and other important databases. In addition, the Metabolomics Society (MetSoc) is now an affiliated society member of *Metabolites*.

We look forward to your contribution. Please feel free to contact us if you have any questions.

an Open Access Journal by MDPI

## Editor-in-Chief

### Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
