Deadline for manuscript submissions:

closed (31 December 2021)

Message from the Guest Editor

Dear Colleagues,

Biodegradable metals represent a good example of metallic materials that are expanding their spectrum of utility. The concept of biodegradable for medical devices/implants is paradigm-shifting, with the prospect of addressing the dilemma of late adverse effects with their current fabricating materials (permanent), and is supposed to spare the secondary surgery of implants removal. Although recent years have seen drastic progress in the research and development of biodegradable metals, their practical clinical use remains challenging.

The clinical translation must be considered at any stage, from materials selection, alloying, processing and surface modification to materials characterization and bio-evaluations.

we cordially invite you to share your cutting-edge research or views on biodegradable metals for a Special Issue in this relevant journal *Metals*. The scope covers all the commonly investigated biodegradable metals, including magnesium (Mg), iron (Fe) or zinc (Zn) -based alloys, among other metals envisioned.

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
