Deadline for manuscript
submissions:

closed (1 February 2022)

Message from the Guest Editor

Dear Colleagues,

In the last decades Micro/Nano-resonators have emerged as excellent tools for sensing. Their applications cover a large range of fields going from the detection of extremely tiny forces to clinical diagnosis. As the size of the devices has been miniaturized, researchers have improved considerably their sensitivity. Regarding biosensing, Micro/Nano-resonators have been used to detect and weigh single cells, viruses and even proteins, which finds enormous applications not only in clinical diagnosis but also in biomedicine.

This Special Issue aims to gather the Micro/Nano-resonator sensing community and emphasize the relevance of this field in plenty of diverse scientific areas. We invite manuscripts for this forthcoming Special Issue on all aspects regarding the application and implementation of these devices, such as advances in fabrication, design and modeling, novel approaches and applications, etc. Both experimental and theoretical contributions are welcome.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q2 (*Mechanical Engineering*)
