### Message from the Guest Editor

This Special Issue, entitled "Probiotic and Postbiotic Properties of Lactobacillus", aims to present recent research on any aspect of the novel Lactobacillus derived from diverse sources of natural, animal, and plant origin in addition to their fermented products, in addition to recent research findings on postbiotics. Some of its focal points include, but are not limited to, the following:

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

- Recent scientific findings of novel probiotic properties of Lactobacillus and their effects on human health
- Novel techniques to isolate Lactobacillus and the evaluation of their functional properties
- Postbiotic properties of Lactobacillus and their functional study
- Industrial application of Lactobacillus for preparation of novel functional foods

Reviews, original research, and communications will be welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
