Deadline for manuscript
submissions:

closed (31 January 2021)

Message from the Guest Editors

In this context, the Special Issue “Microorganisms–Minerals Interactions” invites researchers with original articles, reviews as well as short communication addressing the latest knowledge about:

- Interface interaction between bacterial cells and minerals/stones;
- Microbial weathering of minerals as a source of macro and microelements for oligotrophic ecosystems;
- Biomineralization supporting reconstruction of stone monuments;
- Utilization of minerals as a carries for microorgniasms and their applicationn in the enviroenmtlnal biotechnology;
- Nanowires role in pollution dissemination.

an Open Access Journal by MDPI

Editor-in-Chief

Systems Biology, UFZ-Helmholtz
Centre for Environmental
Research, 04318 Leipzig,
Germany

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
