

Biologic and Molecular Characterisation of Parasites and Antiparasitic Activity of Natural Products: A Themed Issue Dedicated to Dr. Rafael A. Martínez-Díaz

Guest Editors:

Dr. María Teresa Gómez-Muñoz

Dr. Azucena González Coloma

Prof. Dr. María Bailén

Prof. Dr. Francisco Ponce-Gordo

Message from the Guest Editors

Rafael A. Martínez-Díaz, Professor of Parasitology at the Faculty of Medicine in the Autonomous University of Madrid (Spain), was a tireless worker who dedicated more than 30 years of his life to contributing to the advancement of Parasitology. In addition to being an excellent researcher, “Rafa” was an exceptional teacher, much loved by his students for his wisdom, his patience, and his logical and orderly way of teaching.

In the scientific field, Rafa excelled especially in two areas to which he devoted equal parts of his time: the biological, genetic, and epidemiological characterization of animal and human parasites, and the search for new treatments against various parasitosis, especially treatments based on natural products and their components. In this Special Issue, contributions in both thematic areas are welcome in the form of original research, short communications, and reviews.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
