Deadline for manuscript
submissions:

closed (20 January 2022)

Message from the Guest Editor

This Special Issue topic targets the recycling of electrical/electronic scrap through copper smelting, which itself should approach sustainability and circular economy mode by recycling and valorisation of the slag formed.

Papers discussing both the fundamental and applied issues in this emerging field are welcome.

Keywords:

- copper smelting
- copper smelting slag
- electrical/electronic scrap
- recycling
- valorization of copper slag

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
