Deadline for manuscript
submissions:

closed (1 March 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue of the journal is aimed at new results in the field of geochemistry and mineralogy of rare earth elements and actinides, allowing a better understanding of deposits formation, their effective exploration, and REE–An mineral processing, as well as methods of element extraction from ores and their separation, investigation of migration/retardation of long-lived actinides in geological media, and the creation of safe and reliable barriers on their way to the biosphere. We invite authors to publish research articles or comprehensive reviews on this topic. All papers accepted will be published immediately and gathered on the Special Issue homepage.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
