Exploration and Discovery of Natural Plant Pigments' Benefits to Human Health

Guest Editor:

Prof. Dr. Yan Zhang

Food Science and Nutritional
Technology, China Agricultural
University, Beijing, China

Deadline for manuscript
submissions:

closed (15 March 2023)

Message from the Guest Editor

There is growing concern around the world about public health issues such as diabetes, obesity, cardiovascular disease and other chronic metabolic diseases. Natural plant pigments are widely distributed in fruits and vegetables with high contents. These natural plant pigments play a vital role in human wellness through various physiological and biological activities based on their specific chemical structures, attracting researchers, producers and consumers to explore and discover them.

This Special Issue seeks updated, high-quality and advanced research articles and reviews addressing bioactive natural plant pigments and their potential benefits for human health. The authors will explore the biological functions and their mechanisms using in vitro and in vivo experimental models from different aspects. We hope to provide readers with a high-quality scientific basis for understanding the health-promoting effects of natural plant pigments.
