Humaine, CRNH Auvergne, F-
63000 Clermont-Ferrand, France

Deadline for manuscript
submissions:

closed (15 July 2019)

Message from the Guest Editors

Dear Colleagues,

The purpose of this Special Issue is to expand and add to the research on the importance of postprandial metabolism in nutrition. In the transition period between fast and fed statuses, this issue seeks to cover the effects of diet, the nature of meals, and any nutritional characteristics, on meal nutrient metabolism and the ability to regulate metabolism in the postprandial phase. Associations with functional assessment criteria or risk factors can make a very interesting addition. The modulation of these phenomena by genetics and lifestyle is also interesting in this context. This issue welcomes the submission of manuscripts describing original research or reviews of the scientific literature on this topic in humans or animal models (rodents and pigs).

Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
