Deadline for manuscript  
submissions:

**closed (30 December 2021)**

### **Message from the Guest Editor**

Dear Colleagues,

The creation of new products containing specific physiologically active ingredients that contribute to the improvement of our health is a great challenge for scientists, technologists, doctors and nutritionists. The purpose of this special topic is to provide information on the properties and potential uses of bioactive ingredients in the production of food products and their role in human nutrition. There are many substances that, when added to food, give it a functional character and thus help support proper health and the course of natural processes in the body. From the consumer's point of view, it is important that the daily diet is enriched with those bioactive ingredients that most effectively support and regulate physiological processes, and at the same time, in a manner tailored to the individual and specific needs of the body. This Special Issue is dedicated to an overview of the potential of various bioactive compounds in human nutrition. We also encourage potential authors to submit articles on the possibilities of designing new food products to be used in the prevention of various disease states.

Dr. Kieliszek Marek  
Guest Editor

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
