Message from the Guest Editors

Dear Colleagues,

Healing chronic wounds is a painful and difficult long-term process, with risks and great burden for patients. Fortunately, modern wound dressing solutions create easier healing options with many more advantages compared to traditional dressings (better absorption, antibacterial properties, insulation, etc.). In recent years, there has been significant progress in the development of hydrogels as advanced wound dressings. By incorporating bioactive compounds, improving mechanical properties, and creating stimuli-responsive systems, hydrogels have the potential to revolutionize wound care by promoting faster healing, reducing infections, and enhancing patient comfort. In conclusion, we dedicate this Special Issue to all innovative studies of hydrogels as wound dressings in the pharmaceutical field.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
