Deadline for manuscript
submissions:

20 September 2024

Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to highlight the application of bioactive agents, synthesized (as biomacromolecules, peptides, conjugates, nanocomposites, etc.) agents, or promising isolates (such as toxins, proteins, lipids, enzymes, etc.) with high pharmacological and therapeutic activity against sensible and multi-drug-resistant MTB. Studies concerning administration methods as well as carriers are accepted Special Issue, as well as those related to their physicochemical characterization studies, pharmacological and enzymological parameters, drug release, biological activity and in vitro and/or in vivo studies. Reviews of current challenges and potential new drugs launched in recent years are also acceptable. It is hoped that the articles published in this Special Issue can solve the current challenges facing society related to the discovery and knowledge of drugs, as well as explore the advances in medicinal chemistry against MTB.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
