Message from the Guest Editors

Dear Colleagues,

An increasing number of poorly water-soluble small molecules in the pharmaceutical industry pipeline exhibit slow dissolution–absorption and thus poor bioavailability, presenting a major challenge in developing such molecules into medicines. To enhance the solubility and dissolution rate, amorphous solid dispersions (ASDs) have been commonly used as a platform approach.

Within the context of “Materials Science and Engineering”, this Special Issue aims to bring academics and industry practitioners in pharmaceutical science and engineering to disseminate knowledge and information about ASDs, physical stability, formulations and processes, dissolution, solid-state characterization, novel manufacturing methods, modeling, regulatory aspects, etc.

We look forward to receiving your submissions for this Special Issue.

Prof. Dr. Rajesh N. Dave

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
