## Epigenetics, Ecology and Evolution in Algae

Guest Editors:

**Dr. Leila Tirichine**

Department of Biology, University  
of Nantes, CNRS, US2B, UMR  
6286, F-44000 Nantes, France

**Dr. Susana Coelho**

Department of Algal  
Development and Evolution, Max  
Planck Institute for Biology  
Tübingen, Max-Planck-Ring 5,  
72076 Tübingen, Germany

Deadline for manuscript  
submissions:

**15 April 2025**

### Message from the Guest Editors

Epigenetic mechanisms have been extensively investigated in plant and animal genomes, yielding insightful findings into genome regulation and impacts on cell homeostasis, development, diseases and even evolution, in particular from population epigenomics studies. Despite the growing interest in epigenetics and the development of sequencing technologies, knowledge on these processes remains scarce in species outside animals and plants, in particular microbial eukaryotes such as stramenopiles, rhizaria, alveolates and ciliates. Considering the position of these species in the tree of life, investigating their epigenome will help to understand the evolutionary origins of epigenomic components and mechanisms as well as their role in evolution and speciation.

This Special Issue welcomes original research, review, and methodology papers on the epigenetics of model and non-model organisms from protist lineages using multidisciplinary approaches and/or high-throughput technologies to investigate processes such as cell differentiation, sexual reproduction, development, stress response, acclimation and adaptation to the environment.

## Editor-in-Chief

### **Prof. Dr. Dilantha Fernando**

Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
