## Natural Products for Plant Pest and Disease Control

Guest Editor:

**Dr. Kirstin Wurms**

BioProtection, The New Zealand  
Institute for Plant and Food  
Research Limited, Private Bag  
3230, Waikato Mail Centre,  
Hamilton 3240, New Zealand

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editor

The scope of this Special Issue will include products taken directly from nature and used as is, as well as products that have been originally sourced from nature, but which have been subsequently purified and/or combined with other natural products and/or synthesized in the laboratory. It will not include biocontrol agents, which are living organisms in their own right, and therefore are not considered to be inanimate products. Plants can include both terrestrial and freshwater/marine species; disease-causing pathogens encompass all manner of fungi, oomycetes, bacteria, viruses and protozoa; and pests can be insects, invertebrates such as slugs, and vertebrates. The papers must demonstrate efficacy of pest/disease control without significant phytotoxicity or other adverse effects on the host, the environment or human health. Novel research contributions are welcome, exploring all aspects of natural product application on the host/pathogen/pest interaction including efficacy trials/assays, demonstration of integration into an integrated pest management program, and mode-of-action studies based on transcriptomics, metabolomics, and proteomics.

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**  
Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
