Message from the Guest Editors

This Special Issue entitled “marine pollutants” aims to provide an up-to-date and comprehensive view of the hazardous substances, materials and processes that can pose a risk to marine ecosystems and negatively affect the health and the economy of the communities living the coastal areas (i.e., fishing and tourism industry). All the types of marine pollution will be considered: from planetary scale issues such as like oceans acidification, warming and eutrophication to local scale impact such as like oil spills, chemical and biological contamination, underwater noise. Papers dealing with plastic and microplastic in the marine environment are also welcomed. The covered topics will span all the aspect of marine pollution: occurrence, fate and bio-ecological effects of the marine pollutants; impacts on fishing and aquaculture, analytical methods and monitoring techniques; mitigation and remediation strategies; green technologies and blue economy, law and policies.

Message from the Editor-in-Chief

Pollutants is a multidisciplinary, peer-reviewed, open-access journal of all aspects of environmental pollution published quarterly online by MDPI. It covers Environmental Sciences and Engineering, Environmental Systems, Water Resources, Environmental Economics and Policy, Environmental Health, etc. It publishes reviews, research articles, communications, and technical notes. Papers taking a holistic approach among multiple temporal and spatial scales are especially welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within AGRIS, and many other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.7 days after submission; acceptance to publication is undertaken in 9.8 days (median values for papers published in this journal in the second half of 2023).
