Message from the Guest Editor

Dear Colleagues,

Polymer composites have been used for various applications in the aerospace, automotive, marine, military, and sport industries. Recently, polymer-based composites have received attention in the medical field for fabricating bioactive, resorbable, and cell-growth-promoting components for usage in tissue engineering, wound dressing, drug releasing, dental resin-based composites, and surgical implantation. With this in mind, we are organizing a Special Issue on the recent developments and spotlight benefits of various types of polymer composite and fabrication technologies. This Special Issue is open to any subject related to the impacts of the development and research on the medical applications of polymer-based composites.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
