dell'Università, 01100 Viterbo,  
Italy

Deadline for manuscript  
submissions:

**closed (25 November 2023)**

### Message from the Guest Editors

The transport of polymers through membranes is a complicated case of study, physically, chemically, and mathematically speaking. When membrane pores have nanometric dimensions, this process becomes difficult to manage, both phenomenologically and as a philosophy of the applied computational model. We now ask whether the passage of polymers through nanopores occurs naturally or is stimulated, with the forces acting on them being considered, allowing the advancement of polymers.

We invite research focusing on the problems of synthesis, modification, characterization, and modeling of nanometer-size solid-state channels and pores as membrane constituents of either inert or biological nature. Another interesting topic is the strong coupling of the structure and transport in biological channels and polyelectrolyte-modified synthetic nanopores. In short, the structure dictates transport and transport affects structure.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
