### Message from the Collection Editors

The ecological transition from a nonrenewable model of materials' consumption to another based on materials derived from nature or with a biodegradable character requires new lines of research on the acquisition, performance, and characterization of the properties of materials to confirm the achievement of properties for materials/applications and for environment protection.

This Special Issue aims to highlight progress in the use of natural polymeric resources and reinforcements to produce sustainable composite materials that are competitive against those governing the current market based on non-renewable resources.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
