Message from the Guest Editors

Based on the very successful first volume of the Special Issue entitled “**Application of Polymeric Materials in the Building Industry**”, we would like to build on this previous success and continue this great mission in the second edition.

Since modern construction requires more advanced performance, including environmental and economic efficiency, a significant level of traditional material modification is demanded. In these terms, the replacement of various traditional materials takes place toward the production of novel high-quality materials for the building industry, meeting sustainable measures. The customization of building materials by polymers represents an important step for the production of new high-quality materials that may find utilization in the building industry.

This Special Issue invites research papers as well as critical reviews aimed at advances in the field of innovative building material design, the development of new characterization techniques, and environmentally related issues.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien
und Polymertechnologie,
University of Potsdam, 14476
Potsdam-Golm, Germany

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
