

Advances in Waste Heat Recovery Using Thermoelectric Generators

Guest Editors:

Dr. Minghui Ge

Dr. Xun Liu

Dr. Ding Luo

Dr. Yulong Zhao

Dr. Yanzhe Li

Deadline for manuscript
submissions:

24 May 2024

Message from the Guest Editors

To achieve the challenge of high thermoelectric performance, research and technology development are needed at multiple levels of materials, devices, and systems. This Special Issue will focus on high-efficiency thermoelectric conversion but is not limited to the following topics:

- Thermoelectric theory
- Thermoelectric materials
- Thermoelectric generator
- Thermoelectric system
- Thermoelectric cooler
- Advanced algorithms
- Optimization methods
- Testing technology
- Application cases

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
