Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editor

The sustainable use of biomass and waste to create products is a strategy that addresses both environmental conservation and the transition towards a biobased economy. This strategy is especially important in today's context, where reducing waste and using resources efficiently are priorities. This Special Issue, titled "High-Value Products from Biomass and Wastes", aims to provide a platform for showcasing and sharing groundbreaking research and advancements in biomass conversion and waste utilisation.

Biomass, which refers to materials like agricultural residues, forestry wastes, and dedicated energy crops, offers significant potential. Additionally, various types of waste such as waste, agricultural byproducts, and industrial residuals present valuable opportunities for conversion into useful products. It is crucial to explore these materials for the production of high-value products like biofuels, biopolymers, and biochemicals in order to expand our resource pool while reducing our reliance on renewable resources.

This Special Issue welcomes contributions that highlight methodologies, advancements, and comprehensive reviews on biomass utilisation and waste conversion.

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
