Message from the Guest Editors

This Special Issue on “Physico-Mechanical Properties and Characterization of Alkali-Activated Solid Waste Based Cementitious Materials” seeks high-quality works focusing on the latest advances and research trends regarding alkali activation technology towards solid waste utilization. Topics include, but are not limited to:

- Alkali activated newly emerging precursors from solid waste and characterization;
- Alkali activated blends of solid waste and traditional precursors (slag, fly ash, and metakaolin) and performance application;
- Novel alkali activator sources and production;
- Physico-mechanical properties, application and modelling of alkali-activated solid waste based materials.

Deadline for manuscript submissions:

closed (5 January 2023)

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
