Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Many processes (including production processes) cause a large environmental burden. The substances that pollute the environment are gases, solids, liquids and heavy metals. Due to the constant increase in people's living standards, the scale of the negative impact of processes, such as production, is huge. For this reason, any activity that may somewhat contribute to reducing the harmful effects of production on the natural environment seems necessary.

The topics could include, but are not limited to, the following:

- Eco-industry;
- The influence of industry on the environment;
- Pro-ecological strategies in company management;
- Efficiency and the optimization of production processes;
- Recycling production waste;
- Using byproducts;
- Rational resource-management policy;
- The combustion of solid, liquid and gaseous fuels;
- Analysis of the possibility of introducing production in a closed circuit;
- The reduction of harmful emissions;
- Technological processes and the environment.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
