This Special Issue “Application of Biochar in Environmental Research” is intended to compile recent research on the production and characterization of biochar to be used in a wide range of environmental applications. Potential topics include, but are not limited to, the following:

- The pyrolysis of organic waste
- Biochar characterization
- Water cleaning using biochar
- Wastewater treatment using biochar
- Enhanced composting with biochar
- Enhanced anaerobic digestion with biochar
- Crop improvement with biochar fertilization
- Heterogenous catalysis using biochar-based catalysts for environmental applications
- The combination of biochar with nanomaterials for environmental applications
