Deadline for manuscript submissions:
closed (20 August 2022)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on the wine ageing process: a crucial phase during which the wine's identity is fine-tuned. The aim is to collect original contributions as well as systematic reviews which cover new findings related to the traditional wine ageing process in casks and/or alternative technological solutions, accelerating ageing processes, the impact of wine cellar environments, the bottle ageing process, and unconventional wine ageing processes. We welcome papers that focus on the assessment of physicochemical and wine sensory properties, consumer evaluations, and new methodologies to control the ageing process. Studies on these topics but focusing on distilled drinks are also welcomed.

Accordingly, we hope that this Special Issue will allow authors to share their results and will provide readers with an opportunity to obtain more information concerning the recent findings related to the wine ageing process.

Special Issue

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus,
SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
