

Advanced Technologies for Vegetable Oil Extraction

Guest Editors:

Dr. Philippe Evon

Laboratoire de Chimie Agro-industrielle (LCA), Université de Toulouse, INRAE, Toulouse INP, Toulouse, France

Dr. Evelien Uitterhaegen

Bio Base Europe Pilot Plant (BBEPP), Rodenhuisekaai 1, 9042 Ghent (Desteldonk), Belgium

Deadline for manuscript submissions:

30 December 2024

Message from the Guest Editors

This Special Issue on “Advanced Technologies for Vegetable Oil Extraction” aims to present novel advances in the development of innovative technologies for the extraction of vegetable oil from various seeds. Topics include, but are not limited to:

- Seed pre-treatments (using microwave technology, drying, extrusion, steam treatment, mechanical treatments, irradiation, etc.);
- Innovative technologies for (chemo-)mechanical pressing (twin-screw extrusion, etc.), process development and characterisation, and their optimization and scale-up;
- Green solvent-assisted extraction (supercritical and subcritical fluids like CO₂, renewable solvents like bioethanol, etc.);
- (Enzyme-assisted) aqueous extraction;
- Valorisation of process waste and by-products (e.g., press cake) through thermopressing and/or injection-molding to produce biomaterials, composite manufacturing, etc;

Alternate vegetable-oil-refining techniques and suggestions of original applications for cakes are not mandatory for this Special Issue. Nevertheless, they will also be appreciated.

an Open Access Journal by MDPI

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
