Message from the Guest Editor

This special issue on “Exploitation and Utilization of Starch Resources in Food” seeks original and innovative research concerned with the functional property improvements, applications, and unconventional source of starch. However, other aspects of the study on starch resources in food are also welcome.

The main areas of interest are:

- Novel methods for improving functional properties of starches;
- Process-structure-function relationships of starch at macro, micro or nanoscale;
- Interactions between starch and non-starch component (proteins, lipids, or other food components) during processing;
- Study on non-traditional starch sources with commercial potential.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
