Message from the Guest Editors

Dear Colleagues,

The present Special Issue of *Remote Sensing* is devoted to the latest developments in GPR systems and applications, with an emphasis both on methodological and technological aspects. The intent of this issue is to have a broad scope, surveying recent progress in GPR in general. Nevertheless, emerging GPR applications based on (but not exclusively) the use of drones, positioning systems and positioning sensors, virtual reality, and monitoring are particularly welcomed. New research and field applications involving multimodal integration with other remote sensing modalities or geophysical data are also of interest.

Open access journals offer perhaps the easiest way to communicate your ideas and latest research outcomes to the international community. We invite you to submit contributions to this open access journal on the GPR topic that is of most interest to you.

Dr. Raffaele Persico
Prof. Fernando L. Teixeira

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
