

Advances in Remote Sensing and Geographic Information Science and Their Uses in Geointelligence

Guest Editors:

Dr. Rodrigo Tapia-McClung

Dr. Alejandro Molina Villegas

**Prof. Dr. Oscar Gerardo
Sánchez Siordia**

Dr. Adán Salazar-Garibay

Mr. Alejandro Téllez Quiñones

Deadline for manuscript
submissions:
closed (31 October 2021)

Message from the Guest Editors

Dear Colleagues,

Many of today's world problems are related to the geographic distribution of population, its activities, and available resources. Climate change, social inequality, or citizen security have a strong spatial component apart from their own characteristics. For this reason, the need to generate new knowledge through scientific research that will serve as the basis for implementing evidence-based public policies becomes evident.

The aim of this Special Issue is to showcase different research papers that articulate scientific developments that are tied to societal needs and are centered around the issues addressed by geospatial information sciences. However, this Special Issue welcomes the submission of contributions dealing with topics related, but not limited, to remote sensing and image processing, computational geointelligence, spatial analysis and modeling, earth sciences and natural resources, and urban studies, network analysis, and mobility.

Mr. Rodrigo Tapia-McClung
Dr. Alejandro Molina Villegas
Prof. Dr. Oscar Gerardo Sánchez Siordia
Mr. Alejandro Téllez Quiñones
Dr. Adán Salazar-Garibay

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
