## Advances in Water Resource Monitoring and Modelling: Water Quantity and Quality Issues

Guest Editor:

**Dr. Diego Copetti**

CNR-Water Research Institute,  
20861 Brugherio (MB), Italy

copetti@irsa.cnr.it

Deadline for manuscript  
submissions:

**10 August 2022**

### Message from the Guest Editor

This Special Issue deals with advances in all of the different fields of research related to monitoring and modelling water research, including: in situ sensor and sensor network development, advances in remote sensing data acquisition, data storage and validation, statistical and process-based model implementation. Contributions dealing with methods to merge modelled and measured data (e.g., data assimilation techniques) or data driven computational methods (e.g., machine learning) are also welcome.
