Non-destructive Sensors and Machine Learning for Food Safety & Quality Inspection

Guest Editor:

Dr. Vassilis S. Kodogiannis

School of Computer Science and Engineering, University of Westminster, 115 New Cavendish Street, London W1W 6UW, UK

Deadline for manuscript submissions:

closed (10 March 2022)

Message from the Guest Editor

Food is routinely screened to assess quality (such as physical appearance and organoleptic properties) and safety (absence of health threatening pathogens and chemical compounds). Non-invasive sensing methods can now accommodate non-destructive, comprehensive, high-resolution spectral and image analyses for real-world safety and quality inspection on rapid food-processing lines.

Topics of this special issue will include, but are not limited to:

- Spectroscopic techniques (UV-VIS, NIR, Raman, NMR, fluorescence, etc)
- Electronic nose and tongue
- Imaging methods (digital, hyperspectral, etc.)
- Fusion of multiple sensors applied to Food Analysis
- Machine learning techniques for Food Quality Inspection
- Deep learning for Automated Food Inspection
- Detection of food adulteration using Deep and Ensemble Learning
- Feature selection and extraction methods to improve classification tasks
- Food authentication, adulteration
- Food Quality evaluation (incl. spoilage, freshness)

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
