Mobile Sensing and IoT Security

Guest Editor:

Dr. Lidia Fotia

Department of Information and
Electrical Engineering and
Applied Mathematics (DIEM),
University of Salerno, I-84084
Fisciano, Italy

Deadline for manuscript
submissions:

closed (25 February 2024)

Message from the Guest Editor

With the advances in mobile technologies, mobile devices are now equipped with many sensors, powerful processors, big memories, and wireless communication modules. However, concerns are being raised in regard to security, privacy, and trust in the context of mobile crowdsourcing. It is important to protect security and privacy in the IoT era for the following reasons: data heterogeneity, human mobility, device diversity, and dynamic topology. This Special Issue aims to gather the latest research outcomes and developments in security, privacy, and trust in mobile and IoT contexts. Topics of interest include but are not limited to:

- Advanced security models for IoT networks and the mobile internet;
- Privacy protection algorithms or mechanisms for data sharing over IoT networks and the mobile internet;
- Novel and lightweight authentication methods for different roles in IoT networks and the mobile internet;
- Trust management models considering diverse trust levels in IoT networks and the mobile internet;
- Evaluation of blockchain-based security and privacy systems for IoT networks and the mobile internet;
- Other security or privacy research directions are also welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
