Deadline for manuscript submissions:

closed (31 January 2022)

Message from the Guest Editors

Dear Colleagues,

Chromatography is the most powerful analytical technique that allows for the separation of all the compounds in multicomponent chemical mixtures. Current trends in bioanalysis require the development of novel analytical procedures, including efficient sample collection and sample preparation protocols for the detection of compounds of interest at trace levels.

The target of this Special Issue is to present novel chromatographic methods using various sample collection and sample preparation techniques for the analysis of compounds of pharmaceutical interest with applications in bioanalysis, toxicology, doping control, medicine, and food chemistry.

With your rich expertise in the field of analytical chemistry, we believe that your contribution to this Special Issue will definitely have a significant impact on the entire scientific research community.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2023).
