Message from the Guest Editor

With our planet facing the escalating impacts of climate change, the worldwide agricultural sector finds itself in the midst of unprecedented challenges. These challenges, significant in magnitude, threaten the pillars of global food security and sustainable development. In response to these pressing issues, we are excited to announce the launch of a new Special Issue, titled "Agronomic Strategies and Crop Resilience in the Face of Climate Change". This Special Issue aims to highlight innovative research that investigates and showcases forward-thinking agronomic strategies.

Potential research areas of interest may include, but are not limited to, the following:

1. Genetic modifications for climate resilience.
2. Advancements in crop nutrition.
3. Sustainable farming practices.
4. Soil health in the context of climate change.
5. Innovative technologies in crop research.

We look forward to receiving your valuable contributions to this pressing and relevant topic.

Yours sincerely,
Dr. Prashant Kaushik
