### Message from the Guest Editors

The energy dependence of our societies should also be the object of analysis and study. It is not only necessary to save individual energy, but to be able to develop mechanisms that allow implementing a use which is less harmful to the environment.

For This purpose, this Special Issue shall gather contributions that help to develop new uses for recycled materials, such as construction and demolition waste, plastics and polymers, agroforestry waste, and pavement waste. Likewise, studies on energy efficiency and new industrial developments that imply lower processing costs are also of interest.

In recent years, circular economy studies have experienced a considerable boom, so this Special Issue will also incorporate work in this field.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
