Message from the Guest Editors

This Special Issue will include a selection of articles addressing networks cooperation aimed at internationalization and sustainability. In our increasingly competitive globalized, complex and world. internationalization and cooperation networks play a key role in the sustainability of both enterprises and countries. The internationalization process is difficult and complex and it generally requires a significant amount of resources (e.g., financial, human, knowledge, innovation, experience, etc.). Cooperation networks may represent a promising alternative to overcome the lack of size and resources. providing the opportunity to achieve more sustainable growth. As well as strategic alliances, this Special Issue is focused on less formal ways of cooperation. In addition to internationalization processes, we encourage submissions from different disciplines, exploring any other forms of cooperation that result in an increase in business competitiveness and offer the opportunity to engage in entrepreneurial sustainability.
